DETAILED ACTION

Applicant's election with traverse of invention I in the reply filed on 11-06-06 is acknowledged. The traversal is on the ground(s) that there may be an allowable generic claim. This is not found persuasive because No claims are considered generic. It is not that allowed method claim 10 requires a pacemaker wherein apparatus claim only recites it as intended use. If applicant were to include the pacemaker in claim 16, the examiner would reconsider the restriction.

The requirement is still deemed proper and is therefore made FINAL.

Claims 16-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11-06-2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Duggan USPN 4,958,632. Dugan teaches an implanted pacemaker and an external device which may activate a reed switch to place the pacemaker in asynchronous mode. The device also generates ecg images on an electrocardiograph 63 using a scanner 16, interface board 10 and memory.
